

Hsien-Chih Chang

Curriculum Vitae

Department of Computer Science
Dartmouth College
Room 113, Engineering and Computer Science Center
15 Thayer Drive, Hanover, NH 03755

hsien-chih.chang@dartmouth.edu
+1 (217) 898-1041
<https://hcsoso.github.io/>

Research Interests

Discrete/computational topology and geometry, with focus on low-dimensional objects like points, lines, polygons, curves, surfaces, triangulations and meshes, etc. **Graph theory and algorithms**, usually from a structural perspective. **Metric embeddings**, in particular, representation and sketching of graph metrics.

More broadly, I am interested in connections between mathematics and theoretical computer science, especially in applying topological tools to understand efficiency of computation. My current active research project revolves around the role of *planar metrics* in computation.

Employment

Assistant Professor (reappointed), Department of Computer Science
Dartmouth College

Fall 2020–

Postdoctoral research associate, Department of Computer Science
Duke University
Supervisor: [Pankaj Agarwal](#)

Fall 2018–Spring 2020

Education

University of Illinois at Urbana-Champaign (Urbana-Champaign, Illinois, USA)
Ph.D. in Computer Science
Advisor: [Jeff Erickson](#)

2012–2018

National Taiwan University (Taipei, Taiwan)
B.Sc. in Computer Science and Information Engineering
Undergrad thesis advisor: [Hsueh-I Lu](#)

2005–2010

Awards and Honors

Junior Faculty Fellowship

2023

Burke award

2020

Best student presentation award at SoCG'16
Untangling Planar Curves [21]

Jun 2016

Richard T. Cheng endowed fellowship

2012–2013

Publications

Most of the papers listed below can be found on <https://hcsoso.github.io/papers/>. The coauthors are listed *alphabetically*; publication with both journal and conference versions is listed only once.

Conference Publications

- [1] *Optimal Euclidean Tree Covers*, with Jonathan Conroy, Hung Le, Lazar Milenković, Shay Solomon, Cuong Than, accepted to SOCG 2024.
- [2] *Computing Diameter+2 in Truly-Subquadratic Time for Unit-Disk Graphs*, with Jie Gao, Hung Le, accepted to SOCG 2024.
- [3] *Shortcut Partitions in Minor-Free Graphs: Steiner Point Removal, Distance Oracles, Tree Covers, and More*, with Jonathan Conroy, Hung Le, Lazar Milenković, Shay Solomon, Cuong Than, accepted to SODA 2024.
- [4] *Covering Planar Metrics and Beyond by $O(1)$ Trees*, with Jonathan Conroy, Hung Le, Lazar Milenković, Shay Solomon, Cuong Than, accepted to FOCS 2023.
- [5] *From Curves to Words and Back Again: Geometric Computation of Minimum-Area Homotopy*, with Brittany Terese Fasy, Bradley McCoy, David L. Millman, and Carola Wenk, in Proceedings of Algorithms and Data Structures Symposium (WADS'23), pages 605–609, 2023.
- [6] *Almost-Linear ϵ -Emulators for Planar Graphs*, with Robert Krauthgamer and Zihan Tan, in Proceedings of the 54th Annual ACM Symposium on Theory of Computing (STOC'22), pages 1311–1324, 2022.
- [7] *Deterministic Algorithm for Euclidean Bipartite Perfect Matching in Near-Linear Time*, with Pankaj K. Agarwal, Sharath Raghvendra, and Allen Xiao, in Proceedings of the 54th Annual ACM Symposium on Theory of Computing (STOC'22), pages 1052–1065, 2022.
- [8] *Untangling Planar Graphs and Curves by Staying Positive*, with Santiago Aranguri and Dylan Fridman, in Proceedings of the 33rd Annual ACM-SIAM Symposium on Discrete Algorithms (SODA'22), pages 211–225, 2022.
- [9] *Clustering under Perturbation Stability in Near-Linear Time*, with Pankaj K. Agarwal, Kamesh Munagala, Erin Taylor, and Emo Welzl, in Proceedings of the 40th IARCS Annual Conference on Foundations of Software Technology and Theoretical Computer Science (FSTTCS'20), pages 8:1–8:16, 2020.
- [10] *Planar Emulators for Monge Matrices*, with Tim Ophelders, in Proceedings of the 32nd Canadian Conference on Computational Geometry (CCCG'20), pages 141–147, 2020.
- [11] *Lower Bounds for Electrical Reduction on Surfaces*, with Jeff Erickson and Marcos Cossarini, in Proceedings of the 35th International Symposium on Computational Geometry (SoCG'19), pages 25:1–25:16, 2019.
- [12] *Efficient Algorithms for Geometric Partial Matching*, with Pankaj Agarwal and Allen Xiao, in Proceedings of the 35th International Symposium on Computational Geometry (SoCG'19), pages 6:1–6:14, 2019.
- [13] *Near-Optimal Distance Emulator for Planar Graphs*, with Paweł Gawrychowski, Shay Mozes, and Oren Weimann, in Proceedings of the 26th Annual European Symposium on Algorithms (ESA'18), pages 16:1–16:17, 2018.
- [14] *Tightening Curves on Surfaces via Local Moves*, with Jeff Erickson, David Letscher, Arnaud de Mesmay, Saul Schleimer, Eric Sedgwick, Dylan Thurston, and Stephan Tillmann, in Proceedings of the 29th Annual ACM-SIAM Symposium on Discrete Algorithms (SODA'18), pages 121–135, 2018.
- [15] *Unwinding Annular Curves and Electrically Reducing Planar Networks*, with Jeff Erickson, extended abstract appeared in Computational Geometry: Young Researchers Forum from the 33rd International Symposium on Computational Geometry (SoCG'17), 2017.
- [16] *Detecting Weakly Simple Polygons*, with Jeff Erickson and Chao Xu, in Proceedings of the 26th Annual ACM-SIAM Symposium on Discrete Algorithms (SODA'15), pages 1655–1670, 2015.

Journal Publications

- [17] *Hard Diagrams of the Unknot*, with Benjamin A. Burton, Maarten Löffler, Arnaud de Mesmay, Clément Maria, Saul Schleimer, Eric Sedgwick, and Jonathan Spreer, Experimental Mathematics, 2023.
- [18] *Tightening Curves on Surfaces Monotonically with Applications*, with Arnaud de Mesmay, Invited to **special issue** of the ACM Transactions on Algorithms (TALG), volume 18, issue 4, pages 36:1–32, 2022. Conference version in Proceedings of the 31st Annual ACM-SIAM Symposium on Discrete Algorithms (SODA'20), pages 747–766, 2020.
- [19] *Dynamic Geometric Set Cover and Hitting Set*, with Pankaj Agarwal, Subhash Suri, Allen Xiao, and Jie Xue, ACM Transactions on Algorithms, volume 18, issue 4, pages 40:1–37, 2022. Conference version in Proceedings of the 36th International Symposium on Computational Geometry (SoCG'20), pages 2:1–2:15, 2020. Accepted to the ACM Transactions on Algorithms (TALG).
- [20] *Spectral Aspects of Symmetric Matrix Signings*, with Charles Carlson, Karthik Chandrasekaran, Naonori Kakimura, and Alexandra Kolla, Discrete Optimization, volume 37, article 100582, pages 1–22, 2020. Conference version in Proceedings of the 44th International Symposium on Mathematical Foundations of Computer Science (MFCS'19), pages 81:1–81:13, 2019.
- [21] *Untangling Planar Curves*, with Jeff Erickson, Discrete & Computational Geometry, volume 58, issue 4, pages 889–920, 2017; **special issue** of invited papers from the 32nd International Symposium on Computational Geometry (SoCG'16). Conference version in proceedings of the 32nd International Symposium on Computational Geometry (SoCG'16), pages 29:1–29:16, 2016.
- [22] *From Proximity to Utility: A Voronoi Partition of Pareto Optima*, with Sarel Har-Peled and Benjamin Raichel, Discrete & Computational Geometry, volume 56, issue 3, pages 631–656, 2016. Conference version in proceedings of the 31st International Symposium on Computational Geometry (SoCG'15), pages 689–703, 2015.
- [23] *A Faster Algorithm to Recognize Even-Hole-Free Graphs*, with Hsueh-I Lu. Journal of Combinatorial Theory, Series B, volume 113, pages 141–161, 2015. Conference version in proceedings of the 23rd Annual ACM-SIAM Symposium on Discrete Algorithms (SODA'12), pages 1286–1297, 2012.
- [24] *Computing the Girth of a Planar Graph in Linear Time*, with Hsueh-I Lu, SIAM Journal on Computing 42(3), pages 1077–1094, 2013. Conference version in proceedings of the 17th International Computing and Combinatorics Conference (COCOON'11), Lecture Notes in Computer Science 6842, pages 225–236, 2011.

Current Submissions and Manuscripts

- [25] *Resolving the Steiner Point Removal Problem in Planar Graphs via Shortcut Partitions*, with Jonathan Conroy, Hung Le, Lazar Milenkovic, Shay Solomon, Cuong Than, manuscript, 2023. Results from this paper have been strengthened and published in *Shortcut Partitions in Minor-Free Graphs: Steiner Point Removal, Distance Oracles, Tree Covers, and More* [3].
- [26] *Near-Linear ε -Emulators for Planar Graphs*, with Robert Krauthgamer and Zihan Tan, 2023. Strengthening the results from *Almost-Linear ε -Emulators for Planar Graphs* [6].
- [27] *Lower Bounds for Planar Electrical Reduction*, with Jeff Erickson, preprint, 2017. Joined with Marcos Cossarini, results from this paper have been strengthened and published in *Lower Bounds for Electrical Reduction on Surfaces* [11].
- [28] *Invertibility and Largest Eigenvalue of Symmetric Matrix Signings*, with Charles Carlson, Karthik Chandrasekaran, and Alexandra Kolla, preprint, 2016. We joined force with Naonori Kakimura and improved the results in *Spectral Aspects of Symmetric Matrix Signings* [20].

- [29] *Electrical Reduction, Homotopy Moves, and Defect*, with Jeff Erickson, preprint, 2015. Some of the results from this paper are being improved in our later paper *Untangling Planar Curves* [21].
- [30] *Asymptotically Optimal Thickness Bounds of Generalized Bar Visibility Graphs*, with Hsueh-I Lu and Yen-Peng Sung, unpublished manuscript, 2009.

Invited Talks

<i>Shortcut Partitions: Steiner Point Removal, Distance Oracles, Tree Covers, and More</i> [3][4] University of Illinois at Urbana-Champaign, Urbana-Champaign, IL, USA.	Nov 2023
<i>Covering Planar Metrics by $O(1)$ Trees</i> [4][25] DIMACS Workshop on Modern Techniques in Graph Algorithms, Rutgers University, New Brunswick, NJ, USA.	Jun 2023
<i>Near-Linear ε-Emulators for Planar Graphs</i> [6], University of Massachusetts Amherst, Massachusetts, USA.	Apr 2023
<i>Linear-size ε-Emulators for Planar Graphs</i> [6], “Minisymposium on Graphs Embedded on Surfaces”, Curves and Surfaces 2022 Palais des Congrès in Arcachon, France.	Jun 2022
<i>Morphing Planar Metrics</i> , “Combinatorial Reconfiguration in Discrete and Computational Geometry”, online workshop.	Aug 2021
<i>Survey on Tightening Curves on Surfaces</i> , Dagstuhl Seminar 21181: “Computational Geometry”, Schloß Dagstuhl, Wadern, Germany. (Virtual visit due to COVID-19 pandemic.)	May 2021
<i>Are All Practical Planar Optimization Problems Easy?</i> , University of Iowa, Iowa, USA. (Virtual visit due to COVID-19 pandemic.)	Apr 2020
<i>Are All Practical Planar Optimization Problems Easy?</i> , Brown University, Rhode Island, USA.	Feb 2020
<i>Toward a Better Classification of Planar Optimization Problems</i> , Dartmouth College, New Hampshire, USA.	Feb 2020
<i>Discrete and Computational Topology: Planar Curves (and Beyond)</i> [14][21][27][29], University of Colorado Boulder, Colorado, USA.	Feb 2018
<i>On Local Crossing Numbers of Complete Graphs and Hypercubes</i> , AMS Special Session on Beyond Planarity: Crossing Numbers of Graphs (a Mathematics Research Communities Session), Joint Mathematics Meetings, San Diego, California, USA.	Jan 2018
<i>Discrete and Computational Topology: Untangling Planar Curves (and Beyond)</i> [14][21][27][29], Theory Day in Taiwan (2017C), Institute of Information Science, Academia Sinica, Taipei, Taiwan.	Dec 2017
<i>Untangling Graphs and Curves on Surfaces via Local Moves</i> [21][27][29], Dagstuhl Seminar 17072: “Applications of Topology to the Analysis of 1-Dimensional Objects”, Schloß Dagstuhl, Wadern, Germany.	Feb 2017

Untangling Curves on Surfaces via Local Moves [21][27][29], Jan 2017
Saint Louis University, Missouri, USA.

Conference and Workshop Talks

Planar Emulators for Monge Matrices [10], Aug 2020
32nd Canadian Conference on Computational Geometry (CCCG'20),
Saskatoon, Saskatchewan, Canada. *Online conference due to COVID-19 pandemic.*

Lower Bounds for Electrical Reduction on Surfaces [11], Jun 2019
35th International Symposium on Computational Geometry (SoCG'19),
Portland, Oregon, USA.

Tightening Curves on Surfaces via Local Moves [14], Jan 2018
29th Annual ACM-SIAM Symposium on Discrete Algorithms (SODA'18),
New Orleans, Louisiana, USA.

Unwinding Annular Curves and Electrically Reducing Planar Networks [15], Jul 2017
Computational Geometry: Young Researchers Forum, 33rd International Symposium on Computational Geometry (SoCG'17),
Brisbane, Australia.

Untangling Planar Curves [21], Jun 2016
32nd International Symposium on Computational Geometry (SoCG'16),
Boston, Massachusetts, USA.
Won the **best student presentation award**.

From Proximity to Utility: A Voronoi Partition of Pareto Optima [22], Jun 2015
31st International Symposium on Computational Geometry (SoCG'15),
Eindhoven, Netherlands.

A Faster Algorithm to Recognize Even-Hole-Free Graphs [23], Jan 2012
23rd Annual ACM-SIAM Symposium on Discrete Algorithms (SODA'12),
Kyoto, Japan.

Computing the Girth of a Planar Graph in Linear Time [24], Aug 2011
17th International Computing and Combinatorics Conference (COCOON'11),
Dallas, Texas, USA.

Teaching

Instruction at Dartmouth College

COSC 30: Discrete Mathematics in Computer Science Spring 2023

COSC 31: Algorithms Winter 2023
Revised the syllabus geared towards modern career challenges. Half lectures and half working sessions that are very effective based on student evaluation.

COSC 2/49.11: Metric Embedding and Sketching Fall 2022
New seminar-style graduate-level course developed at Dartmouth. Very positive student evaluation.

COSC 30: Discrete Mathematics in Computer Science Spring 2022
Second offering of COSC 30, accompanying helpful advises from TAs and students from the previous iteration. Student evaluation suggests that the new format is very effective and helpful.

COSC 30: *Discrete Mathematics in Computer Science* Winter 2022
Revised the syllabus with new materials and course objectives. Partially-flipped classroom with half lectures and half working sessions.

COSC 2/49.09: *Introduction to Computational Topology* Fall 2021

COSC 39: *Theory of Computation* Winter 2021
Revised the syllabus with new materials and course objectives.

COSC 2/49.09: *Introduction to Computational Topology* Fall 2020
New graduate-level course developed at Dartmouth.

Teaching Assistant

“CS374”: *Algorithms and Models of Computation*, teaching assistant. Fall 2014
Ranked as **excellent** by student evaluation.

“CS374”: *Algorithms and Models of Computation*, **head teaching assistant**. Spring 2014
A pioneering course that was in development with less than 50 people. Later on the course launched successfully at full scale with 400 students on average. Syllabus-wise it combines CS473 (Algorithms) and CS373 (Theory of Computation) and is aiming at junior-level students.

CS473: *Algorithms*, teaching assistant. Fall 2013
Ranked as **excellent** by student evaluation.

Mentoring

Research advisor at Dartmouth College. 2020–

Jonathan Conroy, Ph.D. advisee. Working on metric embedding/sketching and geometric optimization, including tree covers for graphs [4][25][3]?? and approximate diameter problem.

Karun Ram, undergraduate student. Working on puzzle design to communicate mathematical ideas.

Benjamin Kallus, Ph.D. student. Worked on distance-related optimization problems on surface graphs.

Dylan Fridman, undergraduate student, Lovelace Scholar. Working on planar curve problems, with joint publication *Untangling Planar Graphs and Curves by Staying Positive* [8].

Research advisor at other universities. 2021–

Shixiong Xu, undergraduate student at Amherst College. Working on computation geometry and topology, studying minimal configurations in virtual knots.

Brad McCoy, Ph.D. student at Montana State University. Working on planar curve problems, with joint publication *From Curves to Words and Back Again: Geometric Computation of Minimum-Area Homotopy* [5].

Santiago Aranguri, undergraduate student at Stanford. Working on planar curve problems, with joint publication *Untangling Planar Graphs and Curves by Staying Positive* [8].

Postdoctoral mentor at Duke University. 2017–2020

Erin Taylor, Ph.D. student. Working on geometric clustering problems, with joint publication *Efficient Clustering under Stability in Near-Linear Time* [9].

Allen Xiao, Ph.D. student, graduated 2020. Working on efficient geometric optimization algorithms in low-dimensional Euclidean spaces, with joint publication *Efficient Algorithms for Geometric Partial Matching* [12], *Dynamic Geometric Set Cover and Hitting Set* [19], and manuscript *Deterministic Algorithm for Euclidean Bipartite Perfect Matching in Near-Linear Time* [7].

Daniel Orenstein, master’s student. Working on tightening toroidal curves.
