

INTRODUCTION TO COMPUTATIONAL TOPOLOGY

HSIEN-CHIH CHANG
LECTURE 14, OCTOBER 28, 2021

ADMINISTRIVIA

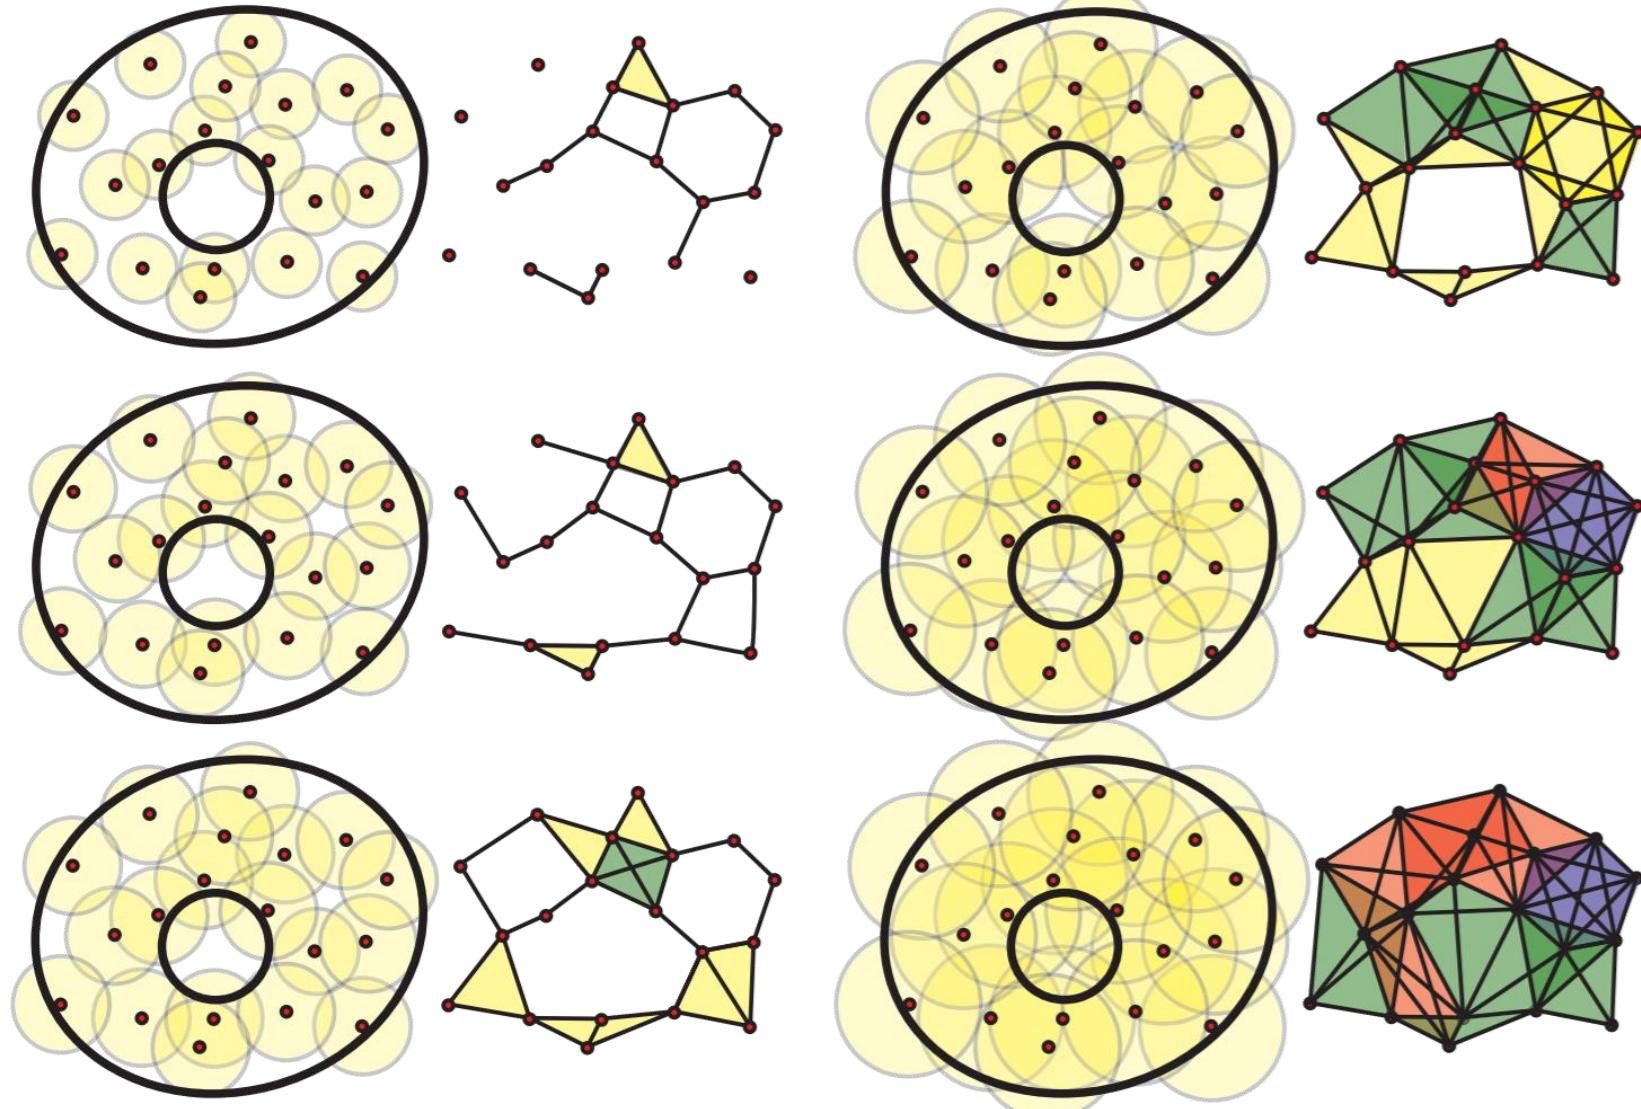

- Homework 4 is out, due 11/8 (Mon)
- Come talk to me about the project (as a group)

PERSISTENCE DIAGRAM

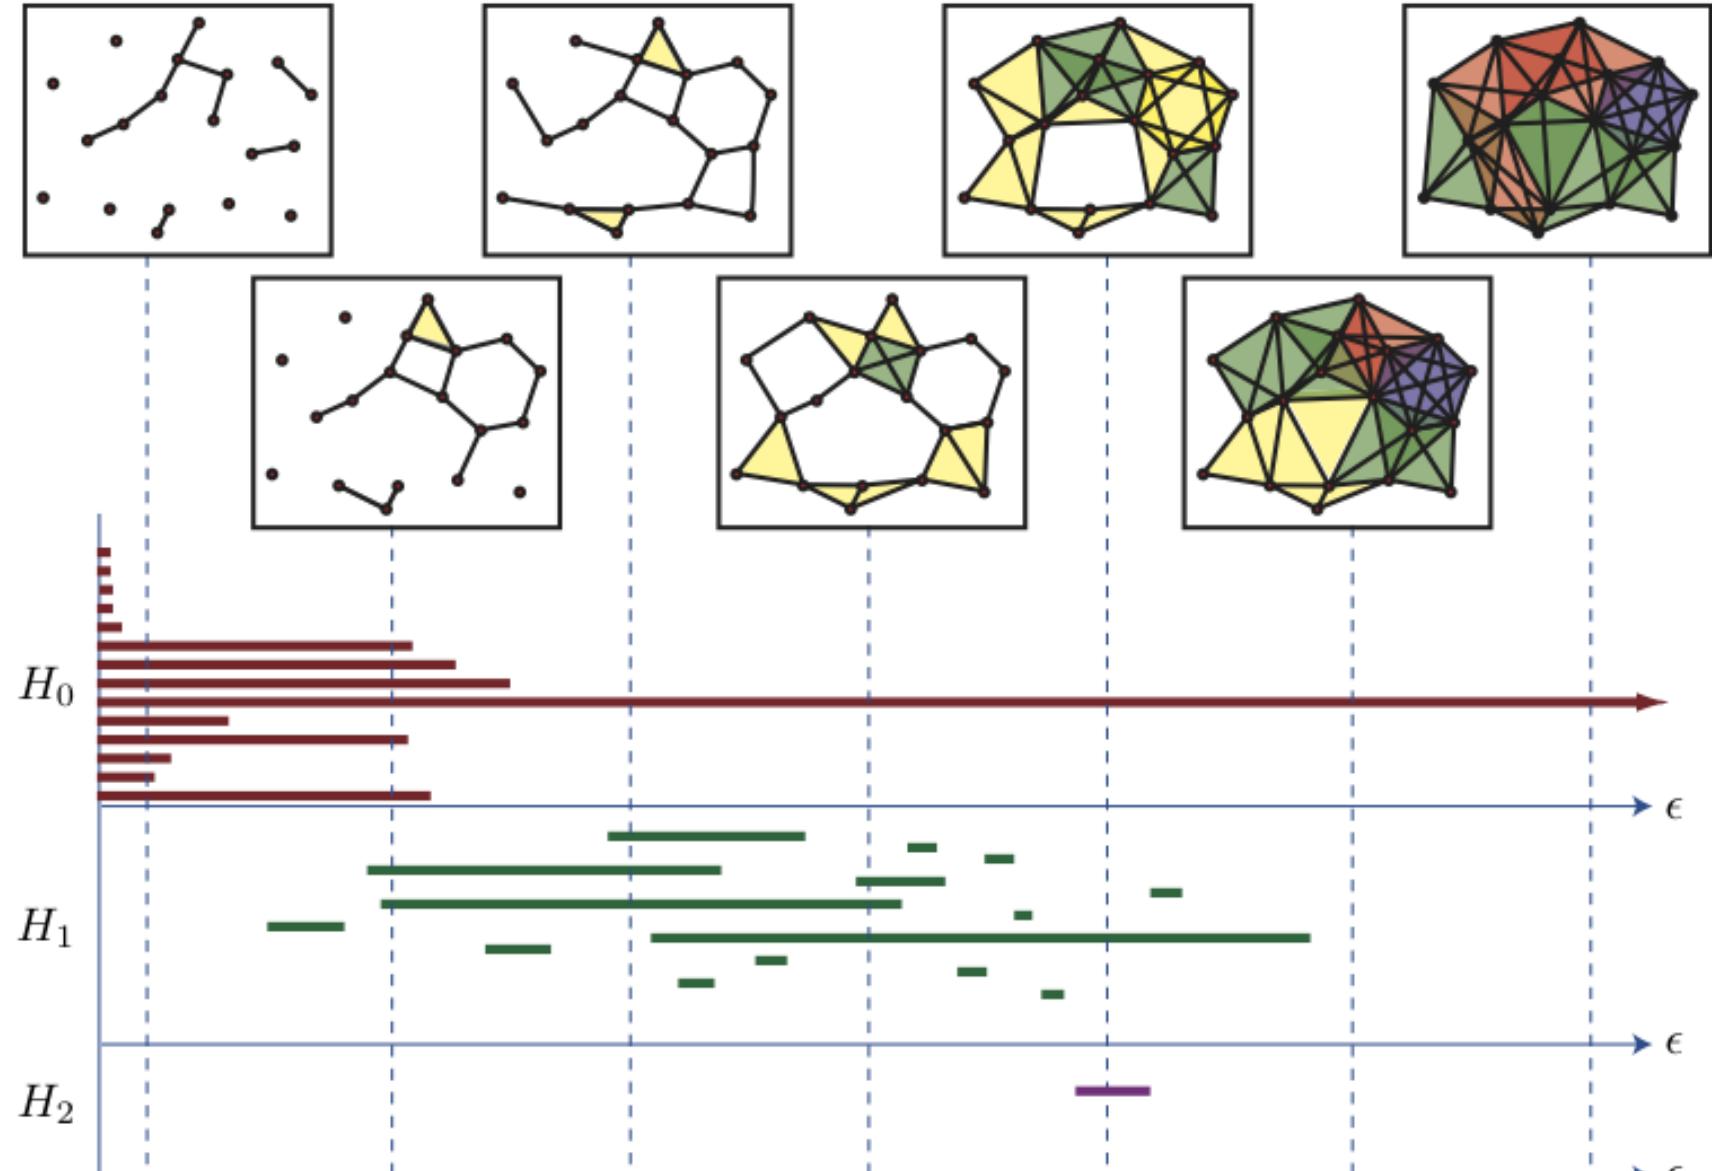

[Ghrist 2008]

COOL IDEA

- Don't guess ε ; take all!

[Ghrist 2008]

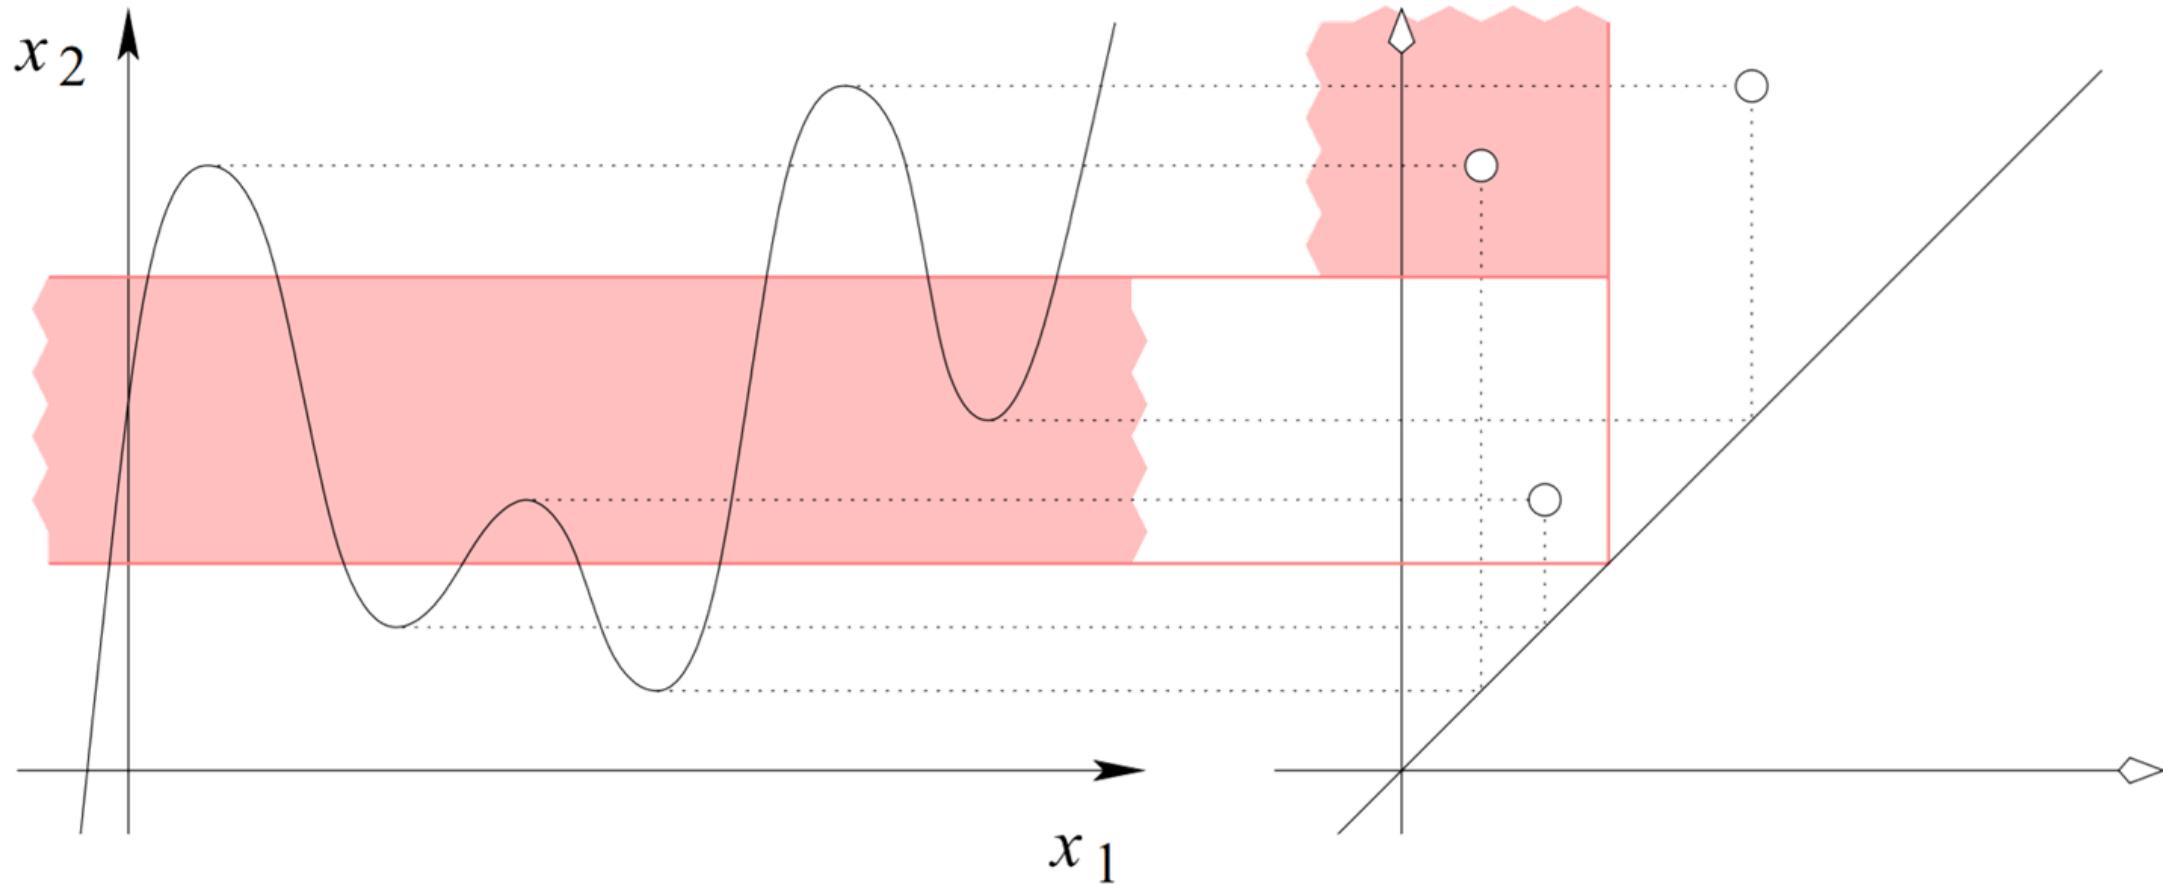

PERSISTENCE

- $\text{Pers}[\gamma] = \varepsilon_j - \varepsilon_i$

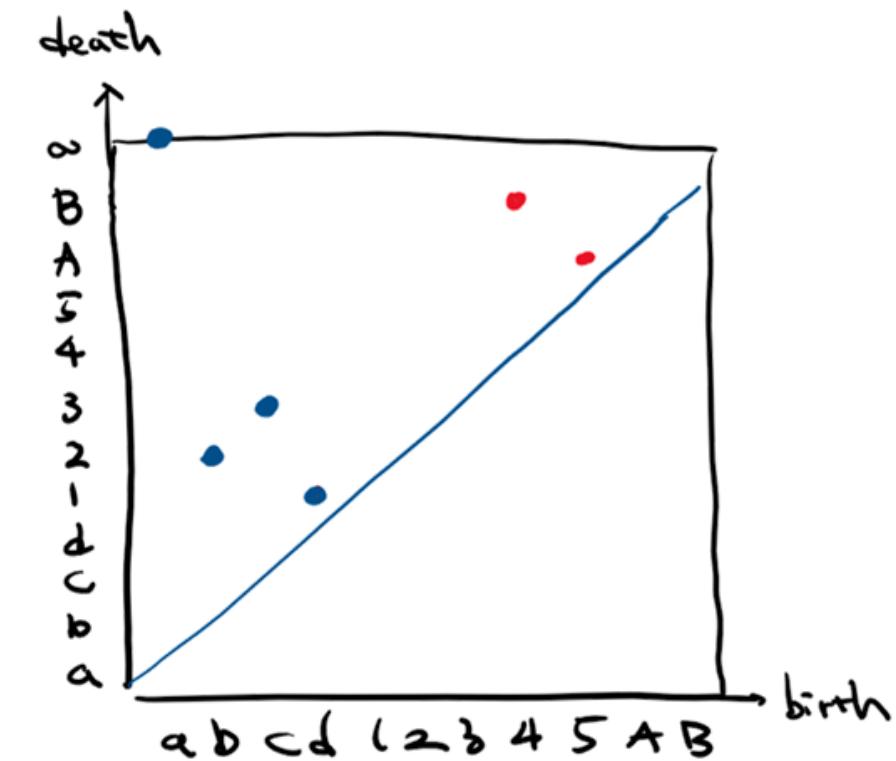

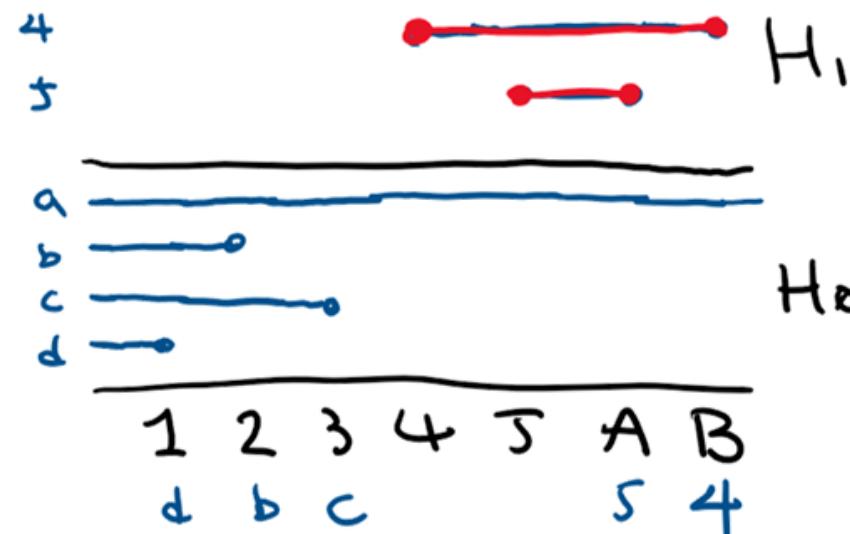

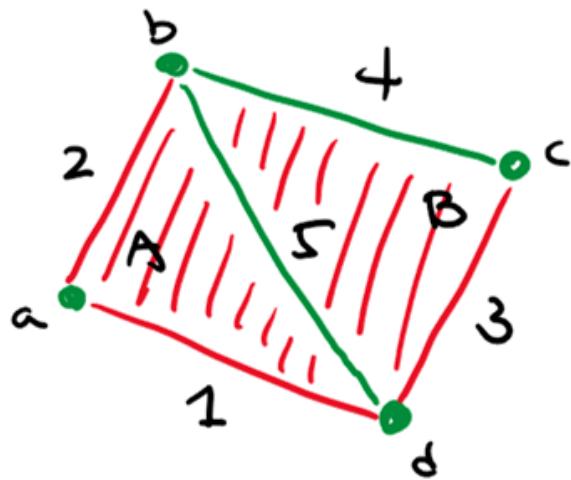

PERSISTENCE DIAGRAM

[CohenSteiner-Edelsbrunner-Harer 2005]

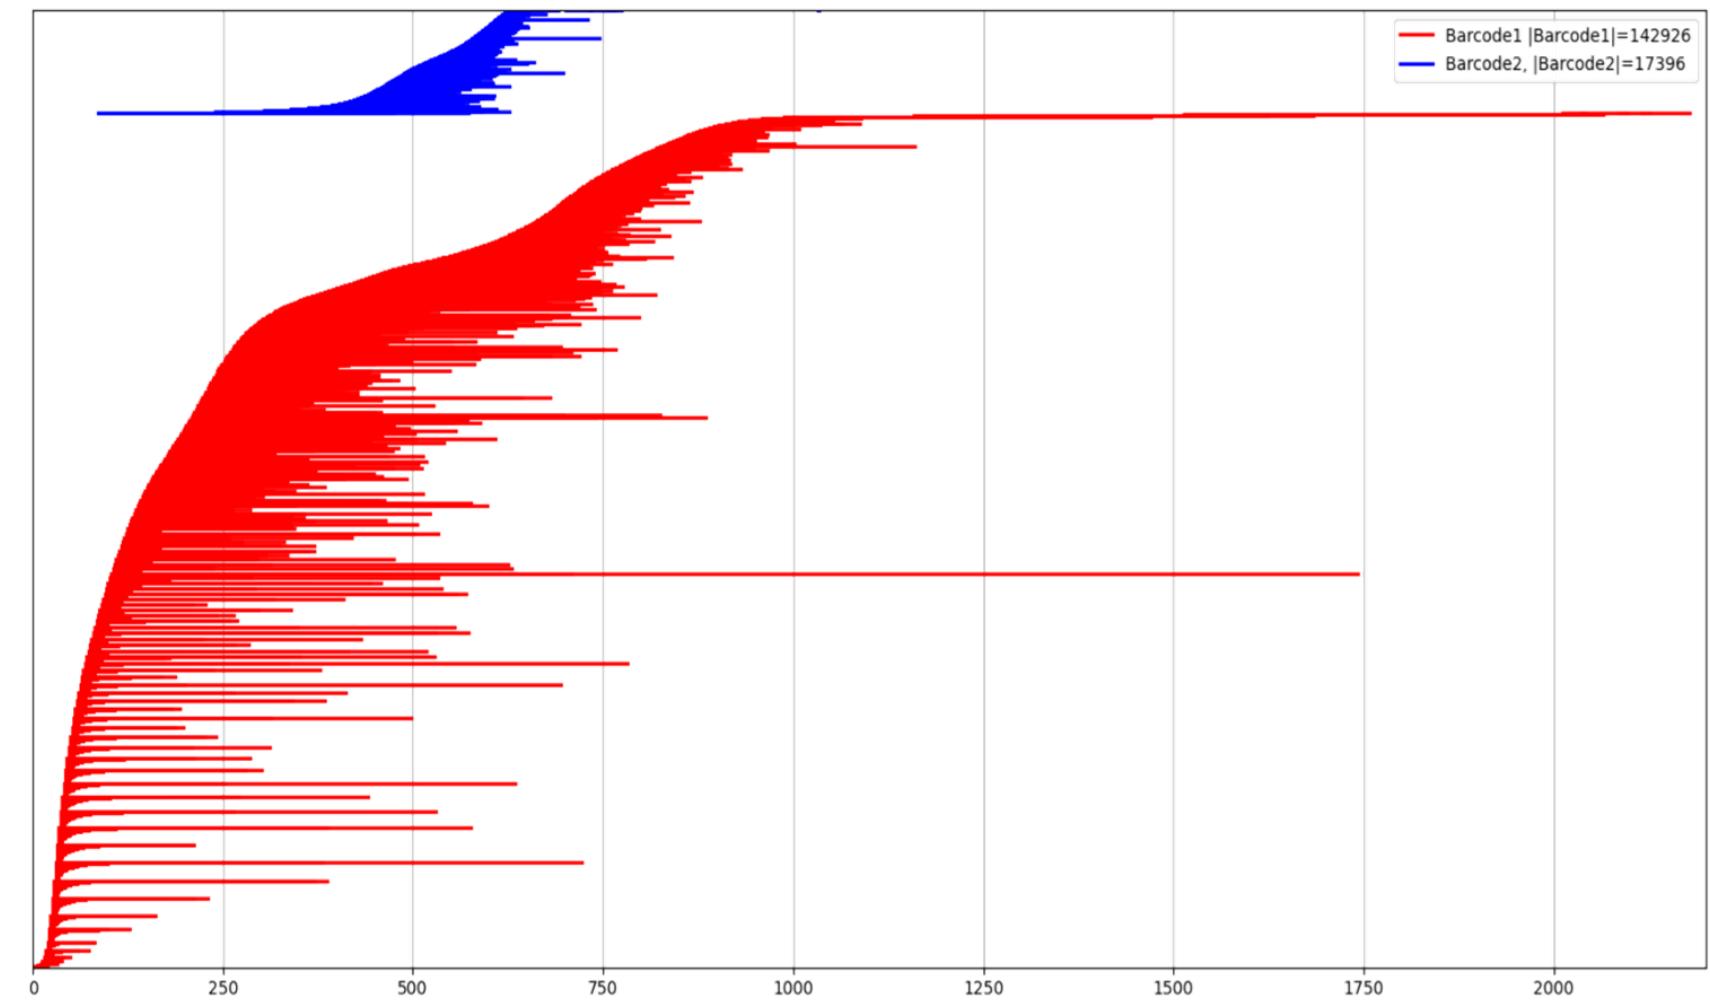

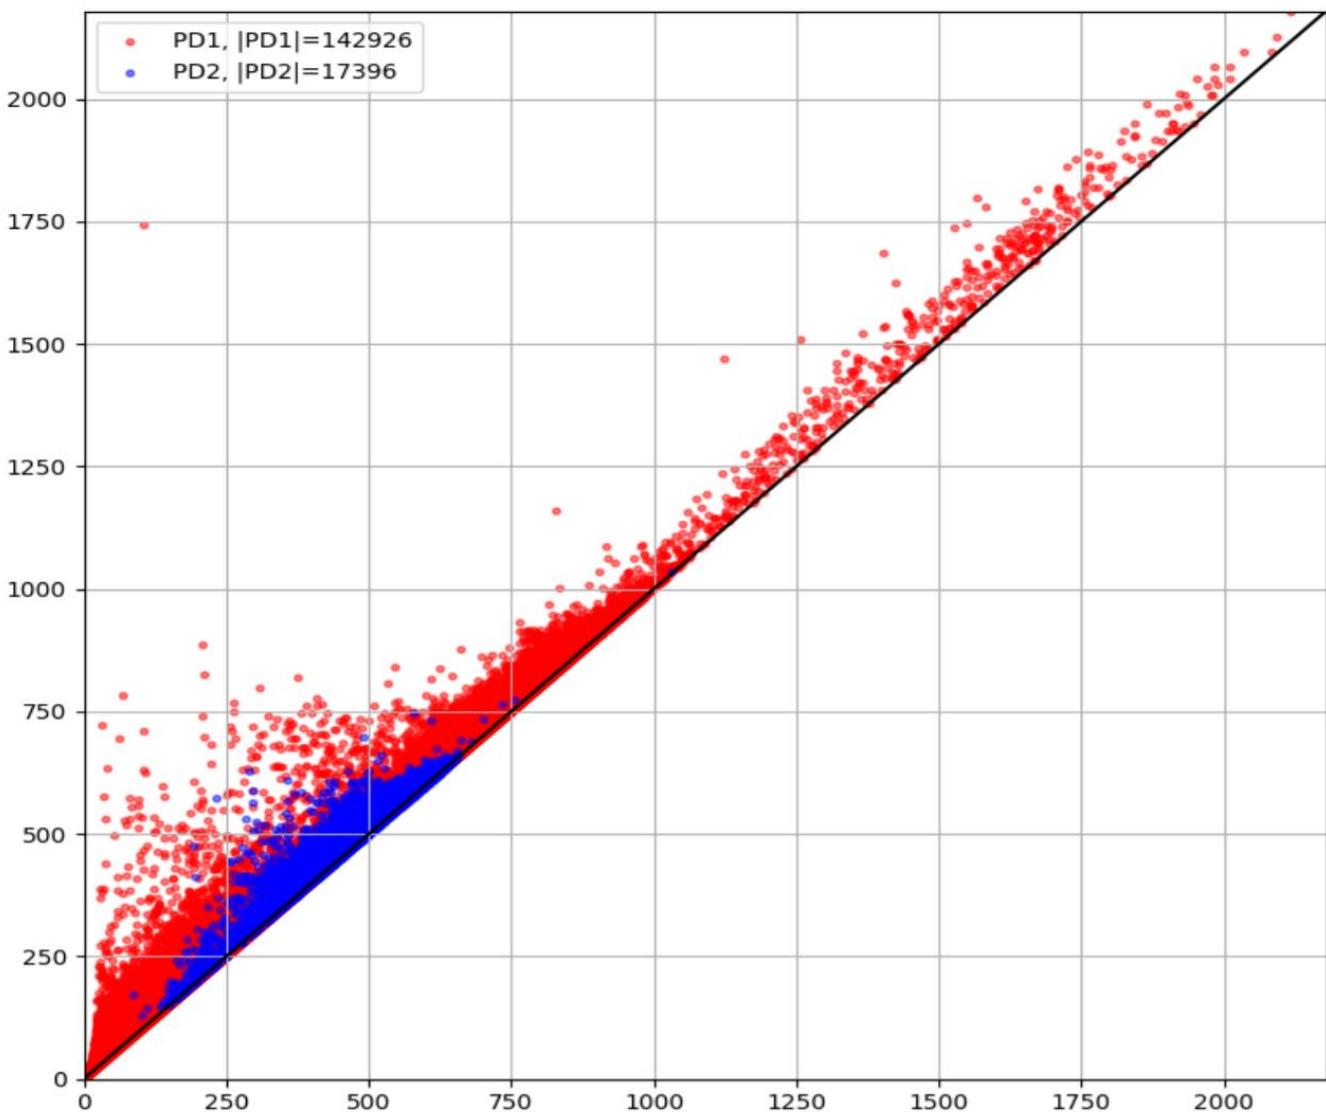

PERSISTENCE DIAGRAM

[CohenSteiner-Edelsbrunner-Harer 2005]

PERSISTENCE DIAGRAM

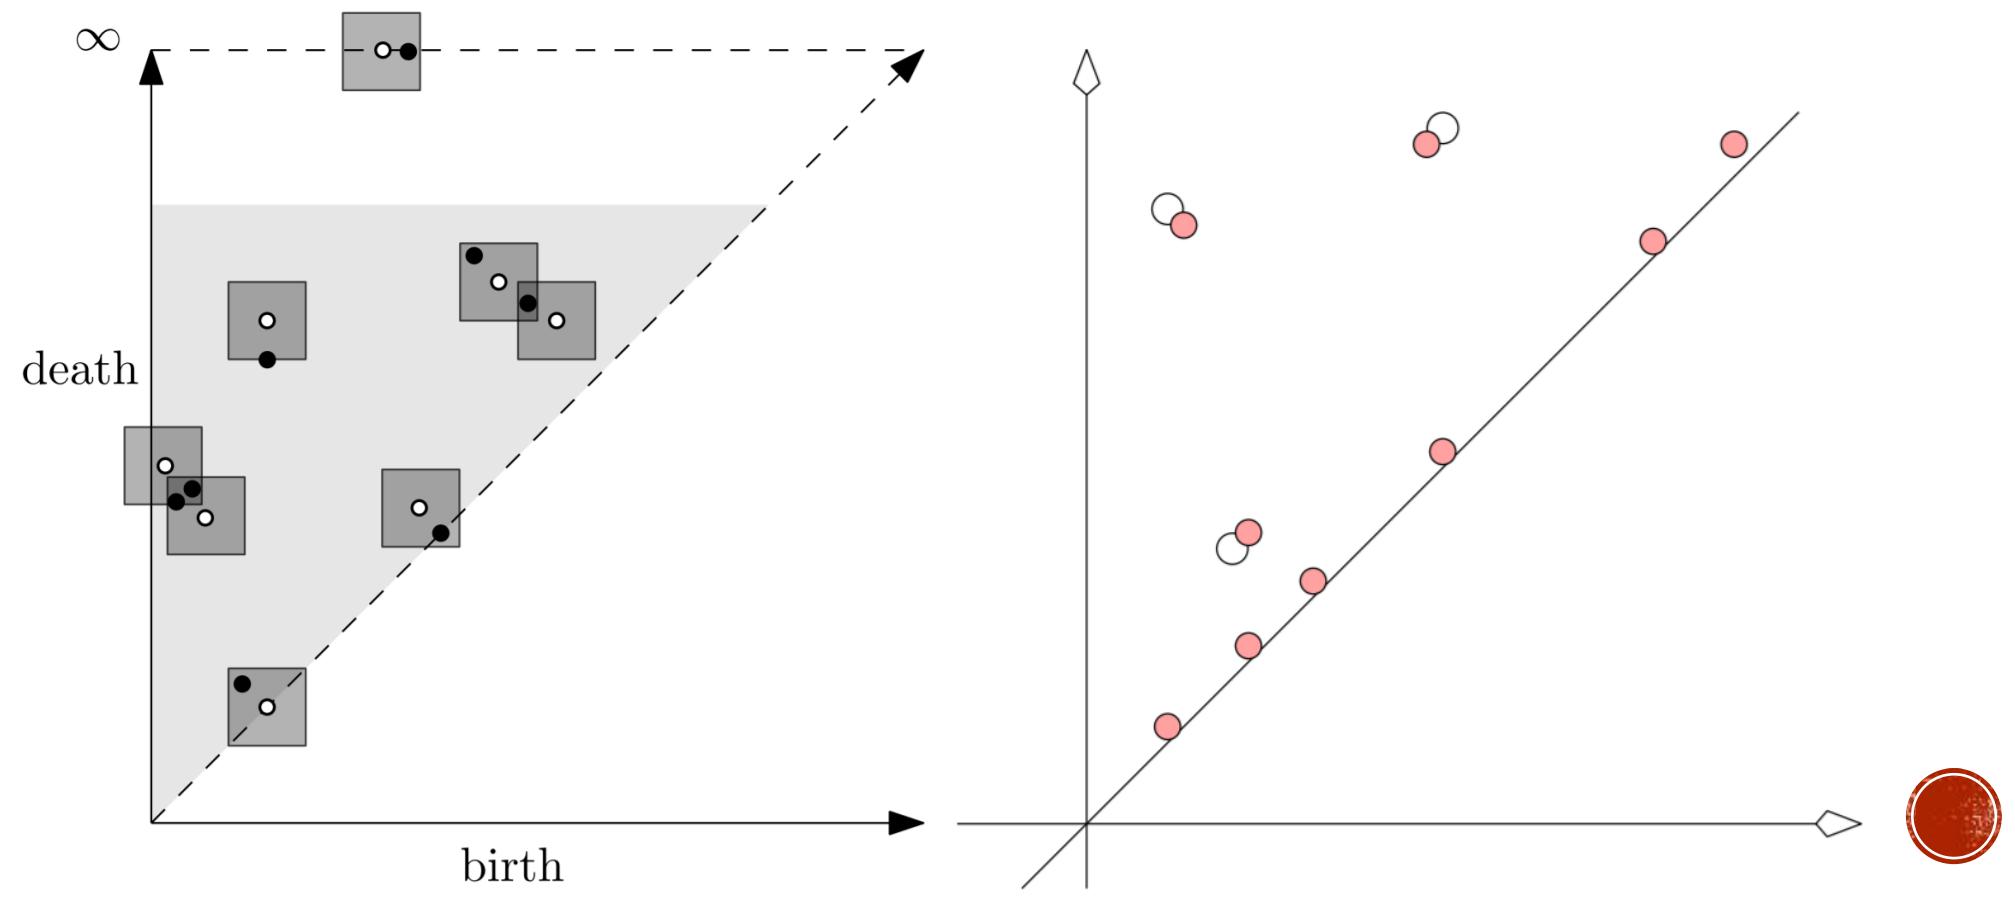

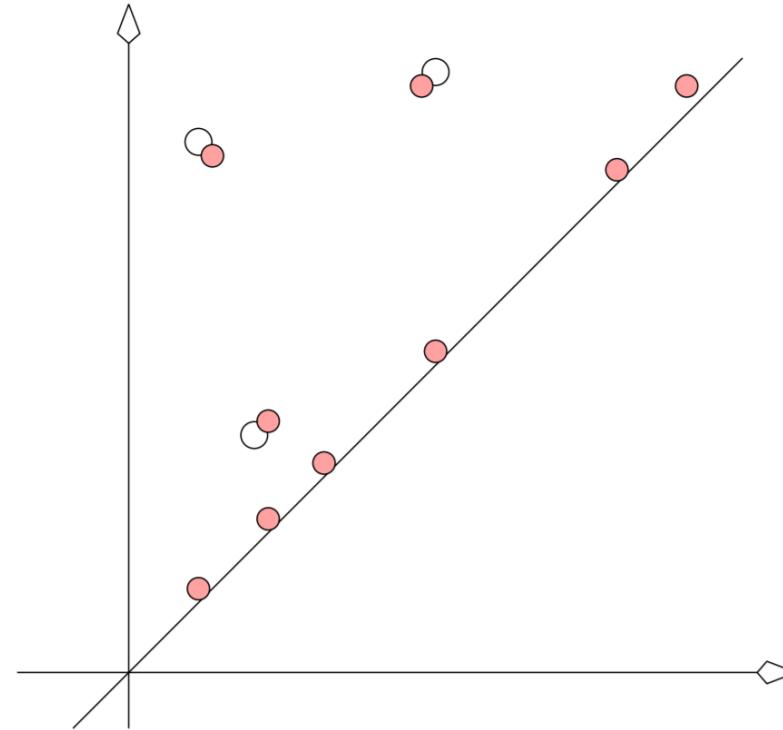

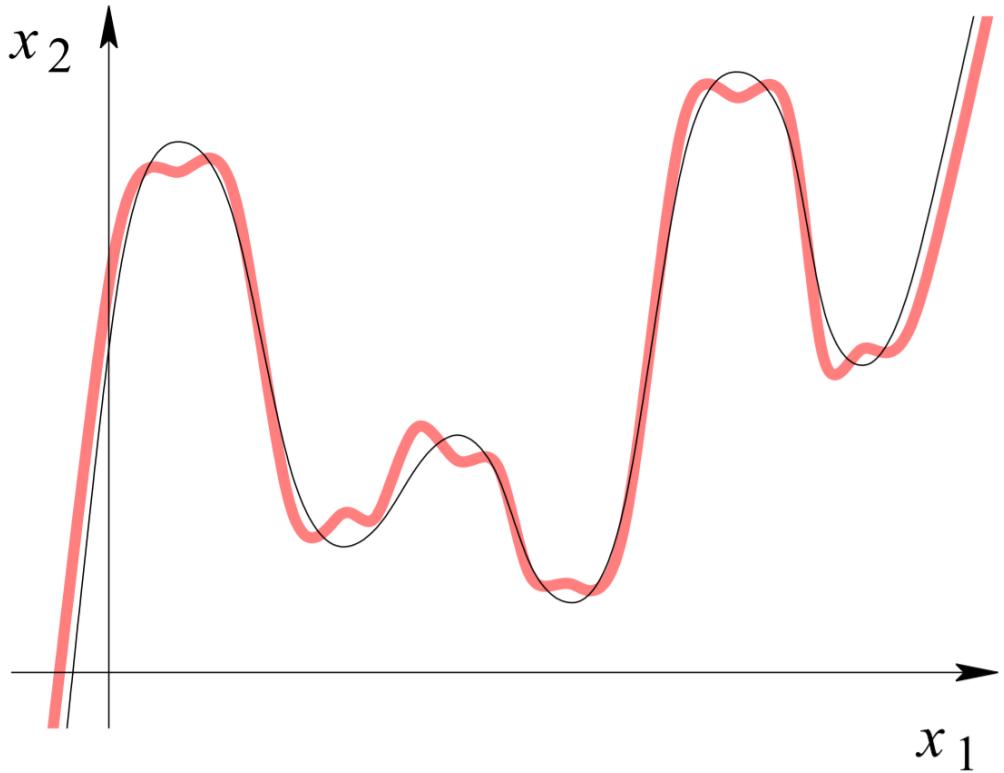

PERSISTENCE DIAGRAM

BOTTLENECK DISTANCE

[CohenSteiner-Edelsbrunner-Harer 2005]

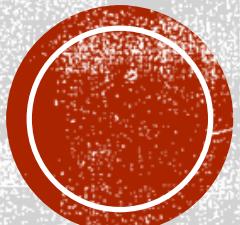

STABILITY THEOREM

[CohenSteiner-Edelsbrunner-Harer 2005] [CS-E-Morozov 2006]

$$d_B(D(f), D(g)) \leq \| f - g \|_{\infty}$$

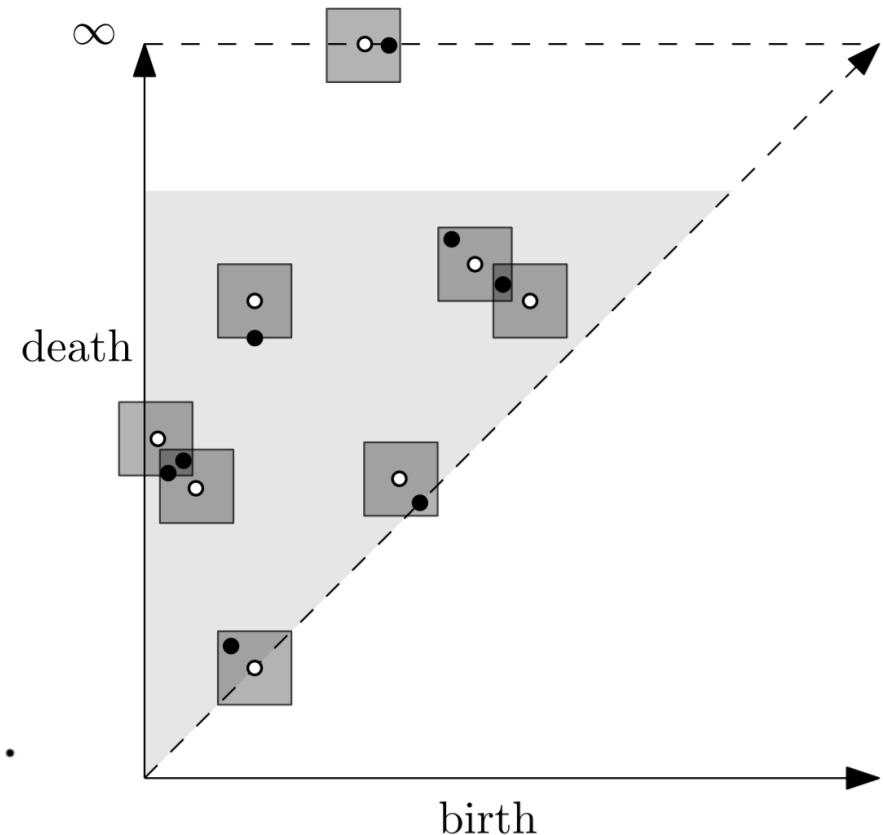

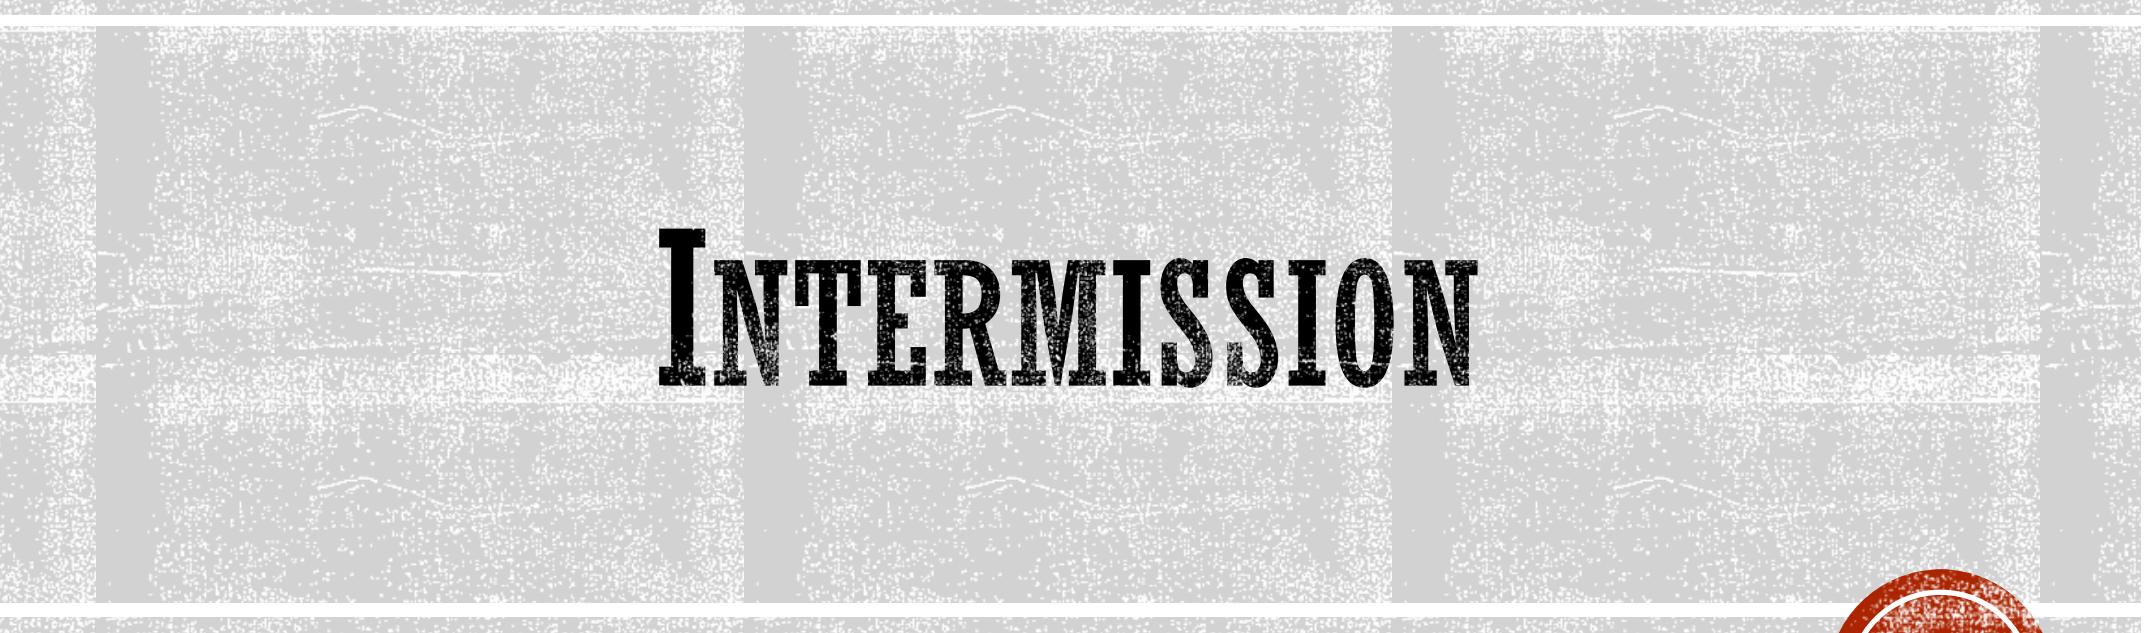

PROOF OF STABILITY THEOREM.

$$\begin{aligned} d_B(\mathrm{D}_p(\bar{f}_r), \mathrm{D}_p(\bar{f}_s)) &\leq \|\bar{f}_r - \bar{f}_s\|_\infty \\ &= (s - r) \cdot \|\bar{f} - \bar{g}\|_\infty. \end{aligned}$$

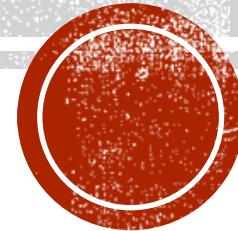

$$d_B(\mathrm{D}_p(\bar{f}), \mathrm{D}_p(\bar{g})) \leq \sum_{i=0}^k d_B(\mathrm{D}_p(\bar{f}_{t_i}), \mathrm{D}_p(\bar{f}_{t_{i+1}}))$$

$$\leq \|\bar{f} - \bar{g}\|_\infty \sum_{i=0}^k (t_{i+1} - t_i).$$

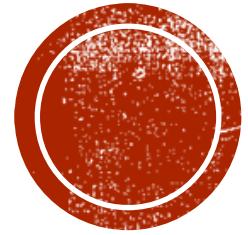

INTERMISSION

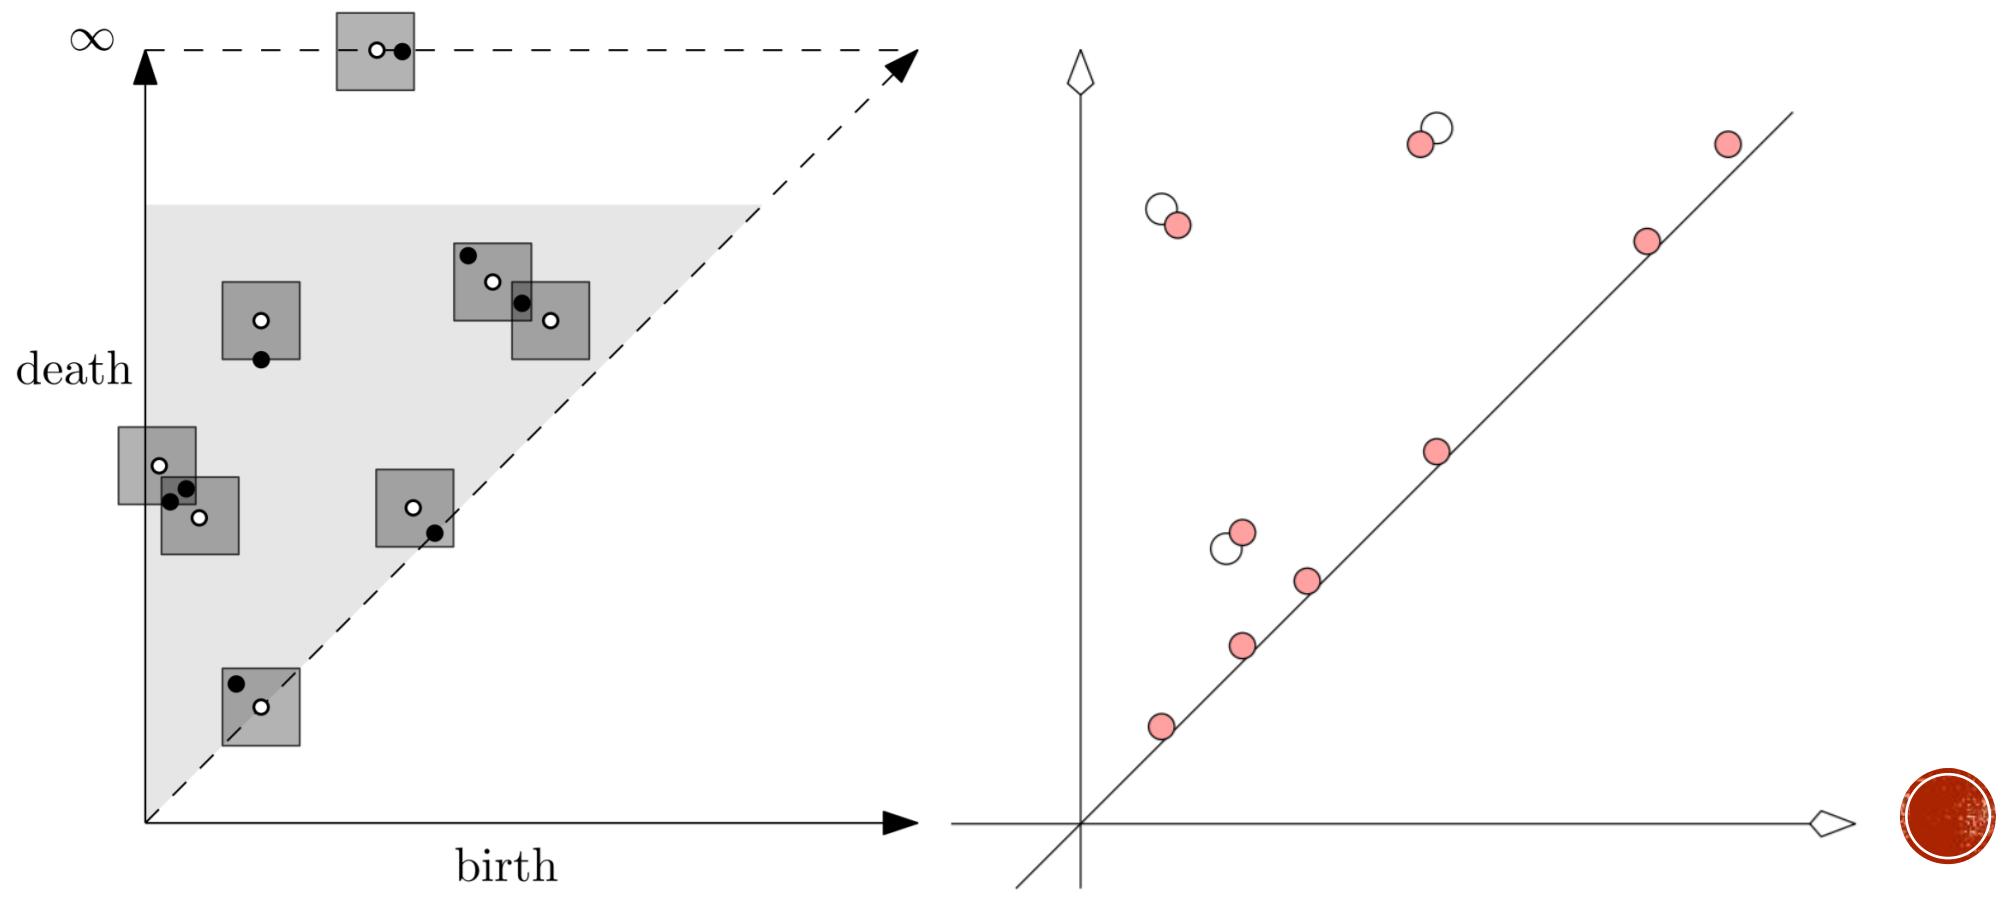

FOOD FOR THOUGHT.
Pros and cons of using persistence diagrams?

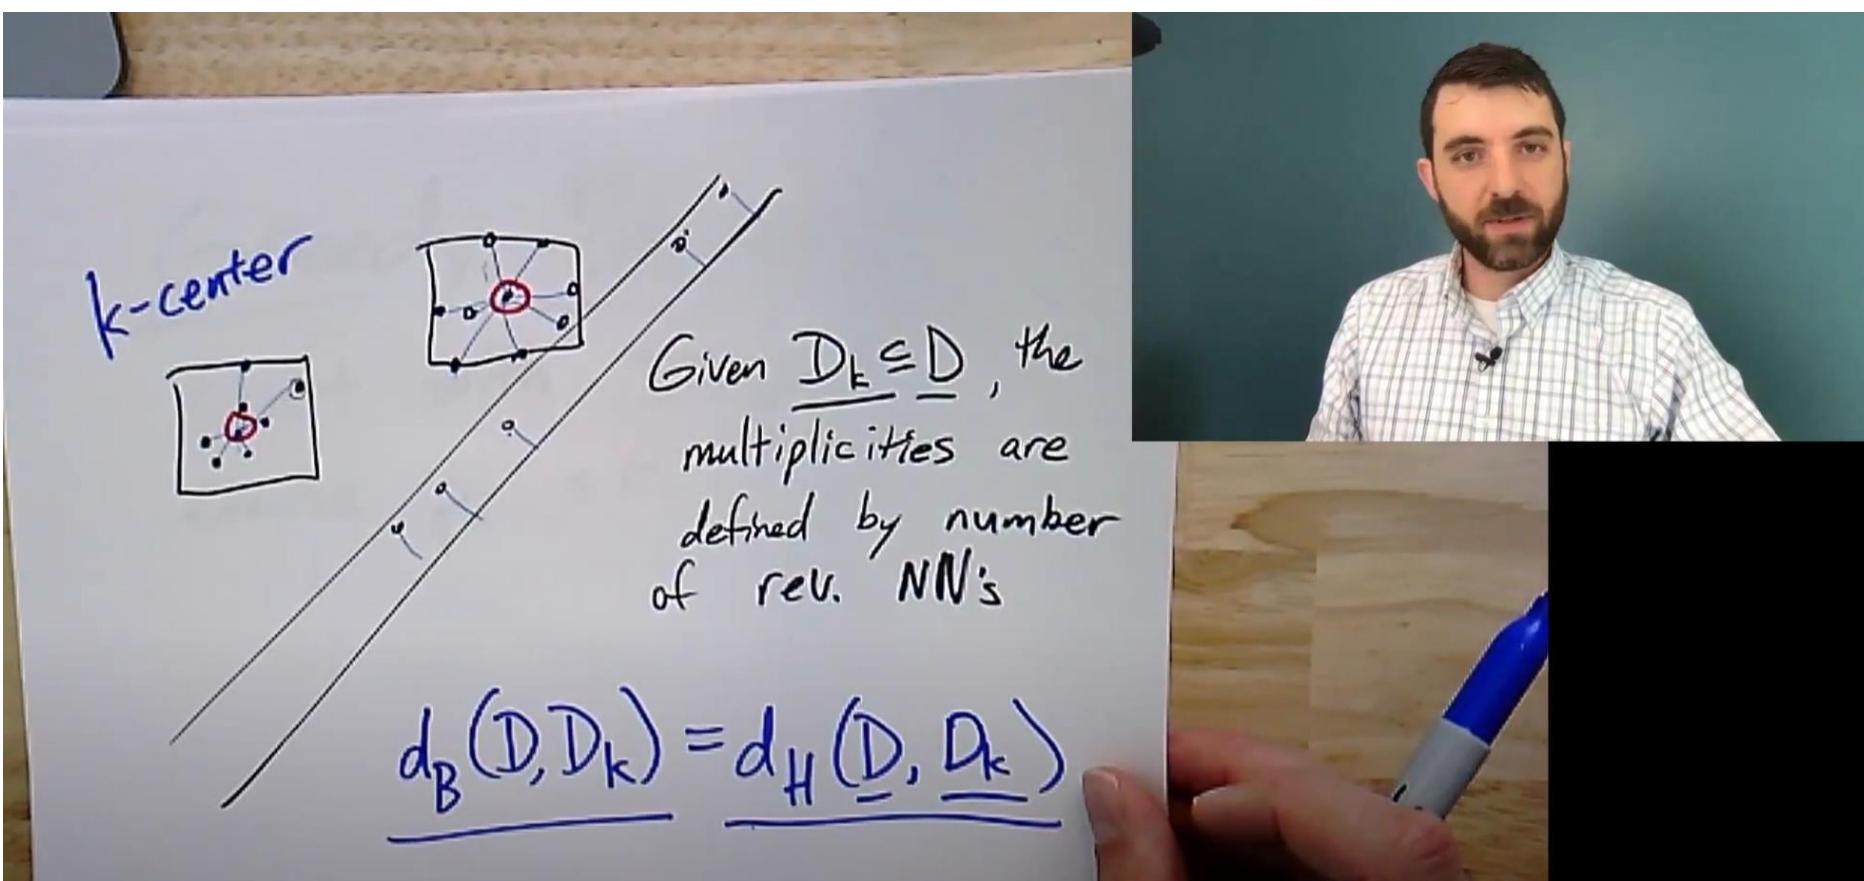

COMPUTATION AND GENERALIZATION

COMPUTING PERFECT MATCHING

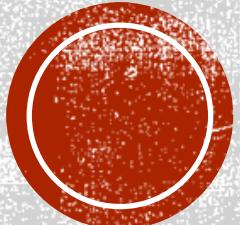

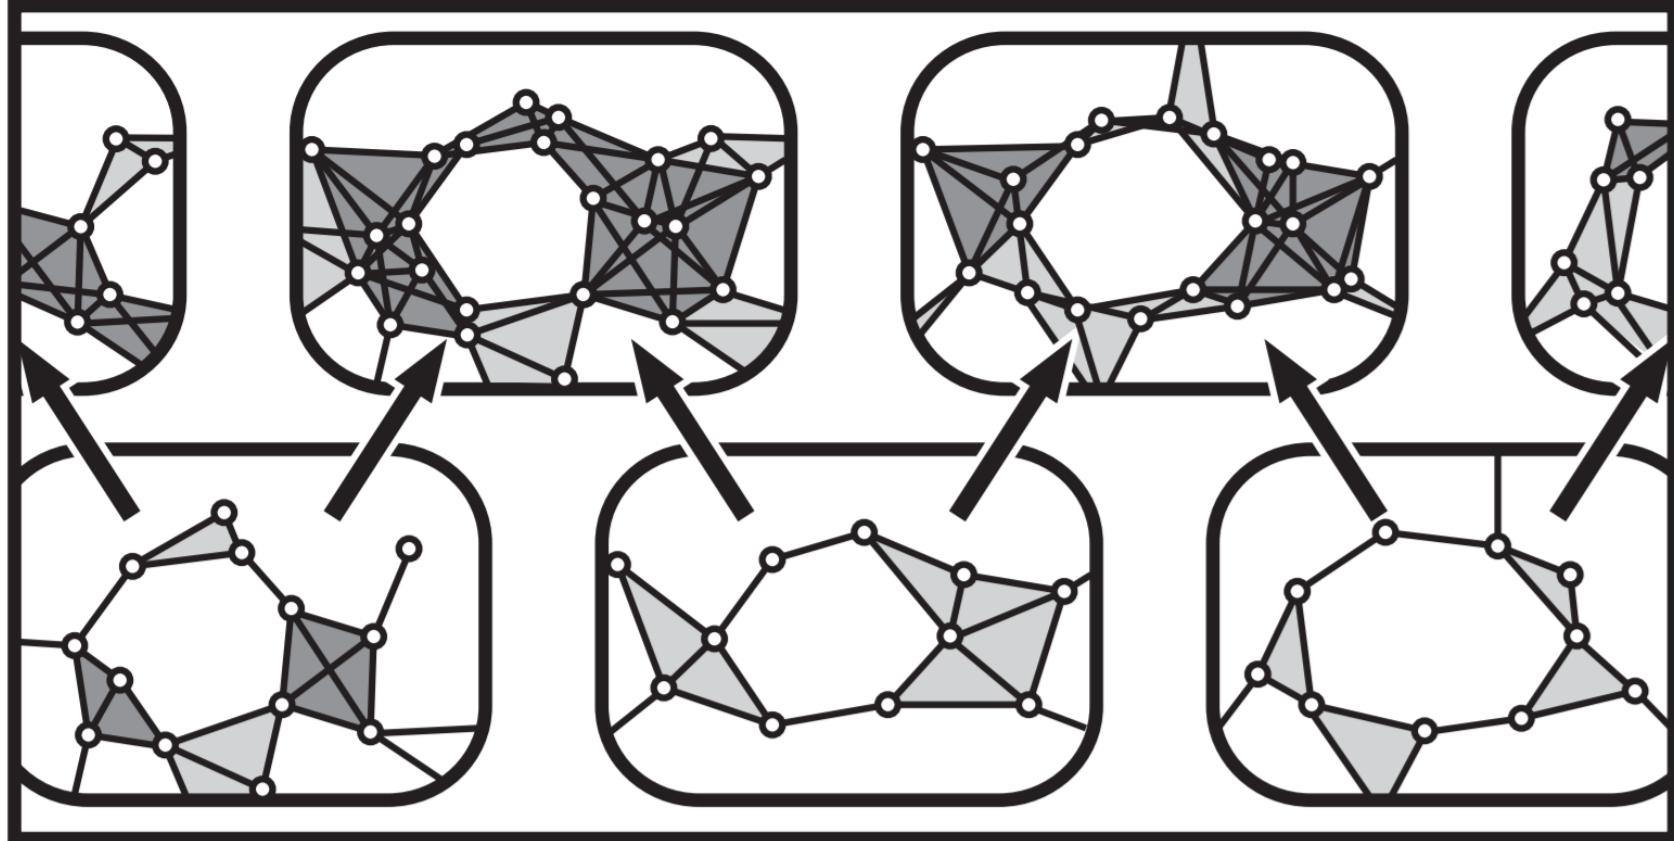

SKETCHING PERSISTENCE DIAGRAMS

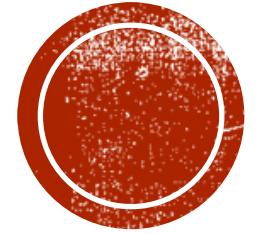

Computing sequence of diagrams of k points converging to optimal, each a 2-approximation to OPT_k

[Sheehy-Sheth 2020]

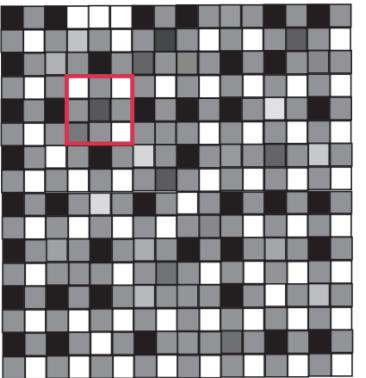

ZIGZAG PERSISTENCE

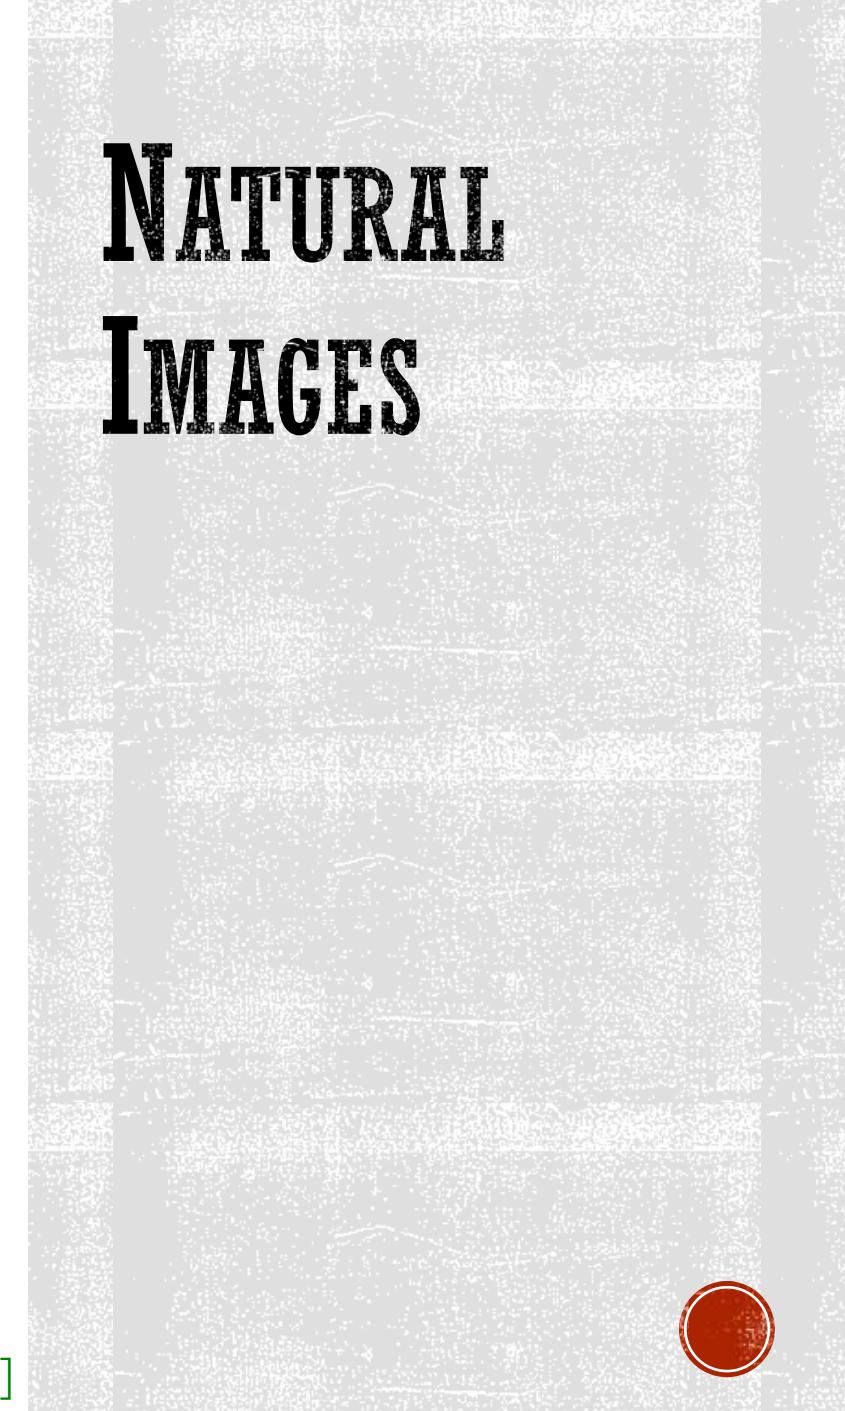

APPLICATIONS

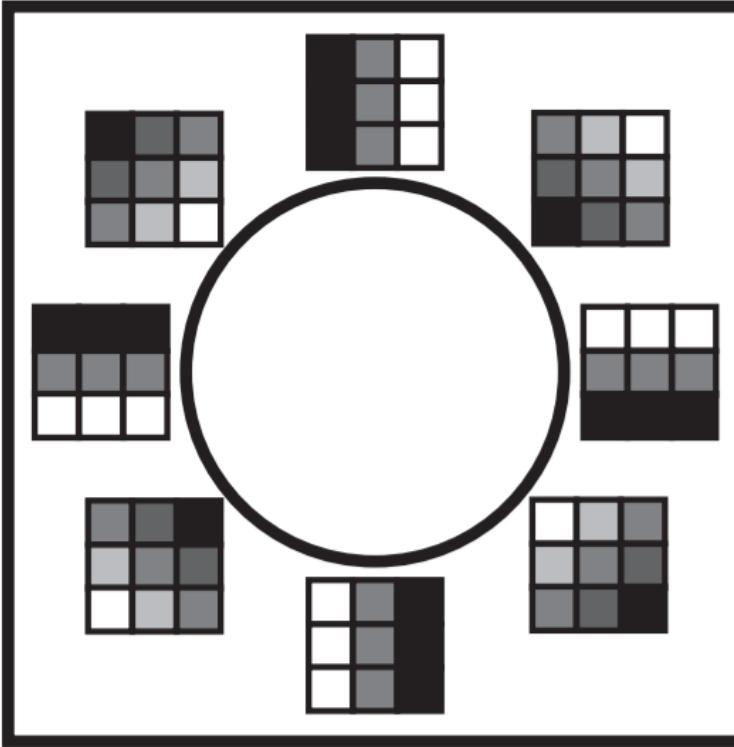

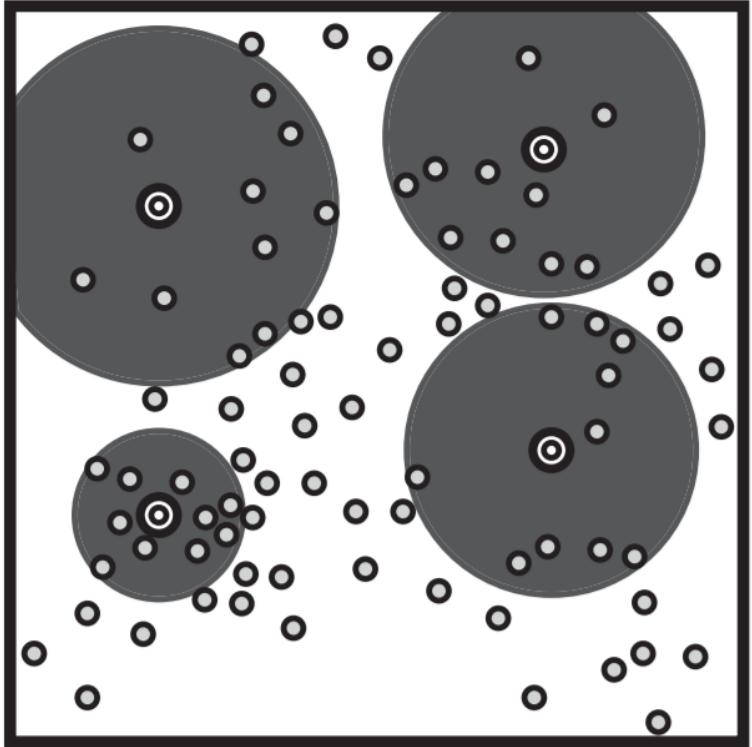

[Lee-Mumford-Pedersen 2003]
[Carlsson-Ishkhanov-DeSilva-Zomorodian 2008]
